Job Description

- Company is currently looking for a financial analyst to join our team who is especially skilled in Microsoft Excel, financial modeling, and PowerPoint.
- Due diligence of the acquisition/development deals on existing models including market research, which then would be analyzed and presented to clients.
- The role includes building models from scratch and improving on the existing models.
- Responsible for analyzing and creating reports on the real estate market and regional economy concerning employment statistics, major company activities, industry trends, and demographics that affect the local real estate market.
- Prepare and present reports to Management and Clients.
- Gradually, becoming a market “expert” with extensive detailed knowledge of the macro and micro factors affecting the market.
