

Online Workshop

Bharati College | R&D Cell × CDC (Samarth Bharat) | Under IQAC

India's AI in Research Ecosystem Workshop(Basic)

AI Research Tools: Ethics Guidelines: Laws

Relevance for Academics, Researchers & PhD Scholars

Principal: Dr Prof.Saloni Gupta

Training Co-Ordinator: Dr Anubha Bhargava

AI & Data Analytics Leader | Researcher | Educator | 20+ Years Experience

Session 1 of 5

Module: Introduction AI lanscape

Every Monday | 11:00 AM – 12:00 Noon | Online (Google Meet) | Starts 6th July 2026

ETHICAL USE OF AI

IN RESEARCH & TEACHING ENGAGEMENT

Empowering Educators with AI for Research, Teaching and Academic Excellence

Organized by

Research and Development Cell

in Collaboration with CDC (Samarth Bharat)

Under the aegis of IQAC

ONLINE MODE

Online
(Google Meet)

STARTS

6th July
2026
(Monday)

DURATION

Every
Monday for 5
Weeks

TIME

11:00 AM
– 12:00 Noon

RESOURCE PERSON

Mr. Anurag Mittal

- *AI & Data Analytics Leader / Researcher / Educator*
- *20+ Years of Experience in Research, Teaching, Analytics and AI-driven Solutions.*

Register here:

Payment details are mentioned in the form

Last date to register:
30th June, 2026.

PROGRAMME HIGHLIGHTS

- Literature Review & Academic Writing
 - Plagiarism Detection & Academic Integrity
- Research Data Collection & Analysis
 - AI-enabled Teaching Material Development
 - Multimedia Content Creation
- Session Recordings will be Provided
- Notes, Practice Resources & Useful Links will be Shared
- Certificate of Participation
- Google Meet Link will be Shared with Registered Participants

FOR ANY QUERIES

Contact: 93195 73696

NEP 2020 Emphasis on AI

Policy Framework

The National Education Policy 2020 emphasizes AI as a critical area for multidisciplinary education. It recognizes AI as one of the emerging technologies that will shape India's future economy and society.

Curriculum Integration

NEP 2020 promotes the integration of AI across all levels of education, starting from schools to higher education institutions, to develop computational thinking and digital literacy among students.

Future Skills Development

The policy emphasizes developing AI skills and competencies to prepare students for future jobs. It recommends creating specialized AI education programs and research centers in higher education institutions.

NEP 2020: Climbing To AI Excellence

Global Leadership

Secure India's position
in technological
advancement &
economic growth

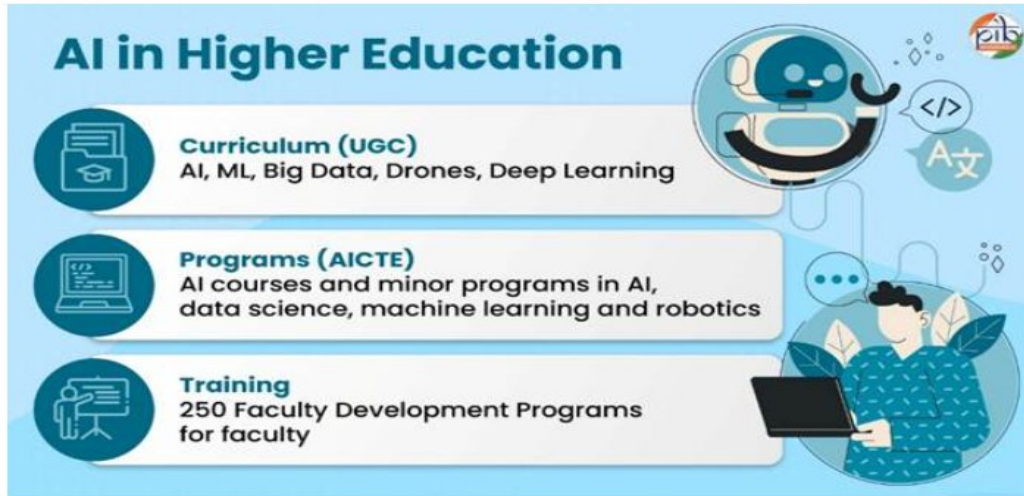

Economic Ambition

Support India's
\$5 trillion
economy goal

Talent Development

Equip youth to
lead in global
AI arena

University Grants Commission (UGC): The 2022 undergraduate curriculum includes AI, 3D machining, big data analysis, machine learning, drone technologies, and deep learning with applications in health, environment, and sustainable living.

All India Council for Technical Education (AICTE):

- Incorporated AI components in all IT-related courses
- Conducts hackathons to promote AI awareness
- Offers women engineering scholarships (PRAGATI, Saraswati)
- Conducts faculty development programs

Perplexity Partners with AICTE

Perplexity, an AI-powered search engine has partnered with AICTE to provide support to 40 million students of 14,000 institutions through digital distribution via AICTE's various communication channels, faculty training session and pilot launches in Centres of Excellence. There is also student access to the Perplexity website/app through institutional onboarding. The purpose of the project is for students to explore how AI tools can support research, innovation and real-world applications. This project aligns with the NEP's emphasis on experiential learning.

MENTOR — LAW & IPR

Tehnopol Science & Business Park — Tallinn, Estonia

WIRED

Welcome to E-stonia, the world's most digitally advanced society

Mentor, Law & Intellectual Property Rights (IPR)

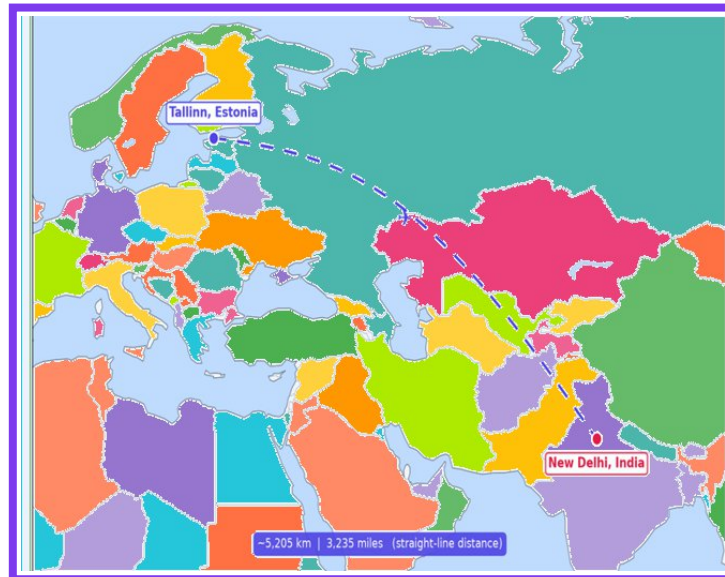

Tehnopol Science & Business Park

An Estonian Government Incubator & Accelerator, Tallinn

Tehnopol is the largest science and business park in the Baltics, founded by the Estonian Government, Tallinn University of Technology and the City of Tallinn. It hosts over 200 technology companies — including Skype in its early years — and runs incubator and accelerator programmes (including a NATO DIANA accelerator) connecting founders with mentors across Estonia and Europe.

Bringing an EU legal & IPR lens to AI governance in Indian research

TALLINN ✈ NEW DELHI (2.5 Hours time lag)

straight-line distance, Tallinn to New Delhi

MINISTRY OF
ELECTRONICS AND
INFORMATION TECHNOLOGY
GOVERNMENT OF INDIA

Digital India
means opportunity
for all, facility for all and
participation of all

श्री २०१९ नरेंद्र
Hon'ble Prime Minister

Celebrating
11 Years of **Digital** India

Empowering every citizen through
Digital Transformation, Innovation
and Inclusive Growth

Four Core Use Cases

Literature Review

- Summarizing papers
- Finding knowledge gaps
- Identifying trends

Research Writing

- Drafting proposals
- Structuring papers
- Improving clarity

Data Analysis

- Pattern detection
- Statistical assistance
- Predictive modelling

Research Design

- Hypothesis generation
- Experiment optimization

IIT Delhi sets new rules for GenAI tool usage by students and faculty

The guidelines have been prepared on recommendations of a panel that found in an internal survey that at least 80 per cent of students and 77 per cent of faculty members have been using AI tools.

From Digital-First to Voice-First: AI That Speaks the Language of the People

Language as Infrastructure for Inclusive & Democratized AI

Expo

 Exhibit Booth Number 3F - 5, 11, 17 |  16-20 Feb 2026 |  Bharat Mandapam, New Delhi

On the use of Generative AI at IIT Delhi

Sumeet Agarwal (EE), Chetan Arora (CSE), Suma Athreye (SPP),
Anurag Goyal (ME), Pardeep Gupta (CSC), Anusha Jain (CH), Kedar
Khare (OPC), Divya Nayar (MSE), Saurabh Rathore (CAS), Subodh
Sharma (CSE), Alan Sinate (DR Acads), Rudrakshi Singhal (ME),
Shuchi Sinha (DMS)

October 30, 2024

April 9, 2024, [IIT Delhi](#) established a committee tasked with developing preliminary guidelines for:

1.The fair use of AI tools in teaching, research and examinations

2.Providing clear guidance of generative AI(GenAI) tools and monitoring advancements in this field

3.Identifying necessary training and support infrastructure for the effective and fair use of Gen AI tools

4.Recommending a governance structure and AI policies aligned with the existing policy framework

SURVEY REACH

427

student responses

88

faculty responses

STUDENT PERSPECTIVES

Adoption is already the norm

80%

of students have used
GenAI tools

81%

of users engage with them
several times per week

~10%

have taken out paid
subscriptions

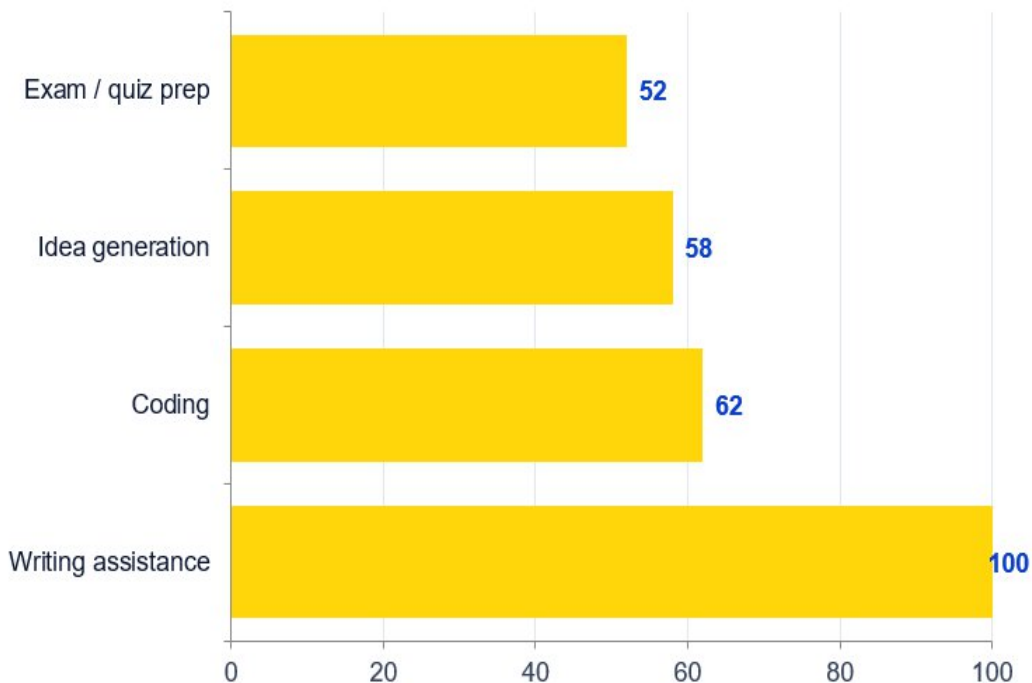

What students said

"Free versions are often inaccurate — we'd prefer access to the paid versions."

STUDENT PERSPECTIVES

What students actually use it for

Beyond these, students highlighted GenAI's value for building mind maps, simplifying complex concepts through examples, and exploring topics via simulations — useful for bridging learning gaps.

100% of respondents

use GenAI for writing assistance — the single most universal use case among students.

STUDENT PERSPECTIVES

Where students hit the limits

Misleading or inaccurate

Responses can be wrong in ways that risk misunderstanding critical subject matter.

Struggles with nuance

Complex or layered prompts often fail to capture context-specific detail.

Weak at reasoning & code

Apparent weaknesses in mathematical/logical reasoning; minimal-to-no code debugging ability.

Privacy & access concerns

A smaller group (<2%) flagged data privacy risks and unequal access due to subscription costs.

STUDENT PERSPECTIVES

Ethics views — and a clear ask for open, guided access

Do GenAI tools raise ethical concerns?

■ 52% — No professional ethics concern

■ 48% — Raised ethical concerns

Where concerns exist:

Intellectual integrity is the central worry — some students feel reliance on GenAI could encourage intellectual dishonesty, limit personal agency in problem-solving, and erode critical thinking and authentic engagement with material.

The clear majority ask

An overwhelming majority support unrestricted yet transparent GenAI use — open access, paired with clarity on limitations and ethics. Many said they'd attend workshops on using GenAI responsibly.

FACULTY PERSPECTIVES

Faculty are engaged — and want more support

77%

have engaged with
GenAI tools

50%

of users engage regularly
(daily to weekly)

17%

have taken out paid
subscriptions

76%

want training sessions
on effective GenAI use

70% of faculty report actively using GenAI tools across academic tasks — writing assistance, summarising research literature, and supporting teaching workflows.

Thank You
